Main projects

Ecommerce ResApi

Create in BACKEND of an ecommers in 5 days

- We developed an Ecommers-API with stylized cart functions using express as a nodejs framework.
- It has user registration for either seller or buyer
- It has a database with PostgreSQL using sequealize as orm.
- Sellers can create products.
- When registering a registration email is sent and when making a purchase as well.

Ecommers Frontend

Create an ecommerce in 7 days with React

- with shopping cart functionalities.
- Registration and login of users.
- Page for each detailed article.
- also includes filtering

Binance Pay Web

Implement Binance's payment method for product sales or ecommerce.

- Made with nextJS.
- without any reference where you can read only the Binance website.
- NextUI Implementation.

Technology

HTML, CSS, JQuery, NodeJS, Express, (NoSQL), Git, Heroku, GitHub, Bootstrap, Sequealize, PostgreSQL, Reactjs, Nextjs, Svelte, Nextui, Paypal, BinancePay.
